Who are we?

Short Brief:

Over 13 years of expertise in the record management industry

Team of experienced and proficient individuals dedicated to serving customer needs.

Over 250+ Clients with more than 10 Million documents handled till date.

Latest technology, user friendly systems and tailor-made solutions in all verticals of record management.

How safe are your documents?

Over 80% of Indian organisations store their own records in substandard conditions.

Overtime these records are either lost or damaged due to pests, fire, moisture, mismanagement or sabotage. This leads to loss of crucial data and risk of legal liability.

Self storage of documents not only puts your documents at risk, but also leads to wastage of prime commercial space.

How can we help?

Tyrus offers various services that ensure the safety and security of your records.

Digitization

- We offer scanning and barcoding of documents.

Record Storage

- We offer storage of physical documents in five-ply boxes at our facility in Manesar.

Document Management System

- Our document management system, E-Securus is a one stop solution for managing digital documents.
